About me

Senior Software Engineer and Full Stack Developer specializing in scalable applications across Full Stack Development, Agentic AI Systems, and Web3 solutions, leveraging cloud, AI automation, and DevOps for efficient delivery.

Experience

Senior Software Engineer

Blockspace Corporation · Full-time
Dec 2025 – Present · 9 mos
Mandaue, Central Visayas, Philippines · On-site

Responsible for designing, developing, and maintaining scalable software solutions across web, mobile, and blockchain applications. Work across the full software development lifecycle, including system design, application development, API development, database design, integrations, testing, deployment, and production support.

Lead the continued development of Xterium, a multi-platform blockchain wallet supporting secure digital asset management and Web3 interactions. Contribute to Xode Blockchain by implementing secure and scalable blockchain capabilities that support decentralized applications and ecosystem services.

Develop Miming CAT, a cross-chain token bridge designed to enable secure and reliable digital asset transfers across multiple blockchain networks, with a focus on interoperability and transaction reliability.

Also lead the development of Polaris, a CRM and business management platform for casino operations. The platform is designed to centralize operational data, streamline business workflows, and provide better visibility into day-to-day processes.

Collaborate with technical and business teams to translate requirements into scalable and maintainable solutions while contributing to system reliability, code quality, and continuous product improvement.

Senior Software Engineer

4NEXGEN · Full-time

Sep 2023 – Nov 2025 · 2 yrs 3 mos

Mandaue, Central Visayas, Philippines · On-site

Worked on the design and development of full-stack applications across AI, blockchain, and business systems. Responsible for implementing features, developing APIs and backend services, integrating databases and third-party services, troubleshooting technical issues, and supporting applications throughout their development lifecycle.

Developed JINA-AI, an AI-powered virtual assistant platform providing intelligent chatbot capabilities and AI-driven business solutions. Worked on core product functionality, system improvements, performance optimization, and production readiness.

Built and enhanced Xterium, a secure multi-platform blockchain wallet for mobile, web, and browser applications. Contributed to the development of its core functionality and supported its evolution into a multi-platform digital asset management solution.

Worked closely with developers, stakeholders, and project teams to translate business requirements into technical solutions. Also contributed to technical planning, feature delivery, system reliability, code quality, and production support across multiple projects.

Software Engineer / IT Business Analyst

HUMEDIT Co., Ltd · Full-time

Feb 2023 – Aug 2023 · 7 mos

Chiyoda, Tokyo, Japan · On-site

Worked as a Software Engineer and IT Business Analyst supporting healthcare and clinic management platforms in Japan. Combined software development responsibilities with business analysis to understand operational requirements and translate them into practical technical solutions.

Worked on healthcare platforms including NIPT, dermatology reservation systems, and invoicing applications. Developed new features, improved existing workflows, resolved production issues, and supported the continuous enhancement of business applications.

Collaborated closely with Japanese and Philippine teams to gather and clarify requirements, discuss technical solutions, coordinate development activities, and ensure that implemented features aligned with business and operational needs.

Software Engineering Team Lead

Human Incubator Inc. · Full-time

Jun 2021 – Jan 2023 · 1 yr 8 mos

Cebu, Central Visayas, Philippines · Hybrid

Led software engineering activities for healthcare and clinic management applications, taking responsibility for technical implementation, development coordination, code quality, and delivery.

Designed and developed the Beauty System, a dermatology reservation platform supporting appointment scheduling, treatment management, billing, and staff calendar management. Also designed and implemented an invoicing and patient management application supporting financial and operational workflows.

Worked closely with business stakeholders and development teams to analyze requirements, design solutions, coordinate development activities, and resolve technical and production issues.

Focused on delivering reliable and maintainable software while improving application performance, usability, and overall operational efficiency.

Software Engineer

Liteclerk Corporation · Full-time
Jan 2019 – Jun 2021 · 2 yrs 6 mos
Philippines · On-site

Worked on the development and enhancement of business management, accounting, and point-of-sale systems for trading and commercial organizations.

Contributed to the evolution of Liteclerk Accounting Software into a cloud-based SaaS platform, improving financial management, reporting, inventory management, and day-to-day business workflows.

Developed a new version of Liteclerk POS with real-time inventory tracking, sales and collection monitoring, and operational reporting to help businesses manage their daily operations more effectively.

Also developed and customized software solutions based on client requirements, including Vaccine Tracker for vaccination eligibility monitoring and notifications and IntelliStream for streaming subscription budgeting and management.

Worked across software development, database design, system integration, troubleshooting, deployment, and production support while collaborating with teams to deliver reliable and maintainable solutions.

Software Developer

Innosoft Solutions Services Inc. · Full-time
Apr 2016 – Jan 2019 · 2 yrs 10 mos
Innosoft Bldg., Corner V. Rama Avenue & R. Duterte St., Guadalupe, Cebu City · On-site

Started as a software development intern and transitioned into a full-time Software Developer role, gaining experience in developing web-based business applications and enterprise software solutions.

Designed and developed the Innosoft corporate website and CRM platform for managing leads, deliveries, customer support, sales activities, issue tracking, and account executive performance.

Designed and developed Easyfis Accounting Software, which later evolved into Liteclerk Accounting Software and became the foundation of Liteclerk Corporation's accounting product.

Worked across the software development lifecycle, including application design, full-stack development, database development, testing, troubleshooting, deployment, and system maintenance.

Collaborated with business teams and clients to understand requirements and deliver software solutions that addressed operational and business needs.
