About me

Senior Software Engineer and Full Stack Developer specializing in scalable applications across Full Stack Development, Agentic AI Systems, and Web3 solutions, leveraging cloud, AI automation, and DevOps for efficient delivery.

Experience

Senior Software Engineer

Dec 2025 - Present

Blockspace Corporation (Cebu, Central Visayas, Philippines)

Enhanced and expanded Xterium as a secure multi-platform blockchain wallet across mobile, web, and browser, strengthening usability, asset management, and reliable Web3 interactions. Contributed to Xode Blockchain as a senior engineer, implementing secure and scalable Web3 capabilities that support decentralized application development. Developed Miming CAT, a cross-chain token bridge that enables secure and seamless transfer of digital assets across multiple blockchain networks, expanding interoperability within the ecosystem. Building Polaris, a CRM platform for casino operations designed to streamline business workflows, centralize operational data, and improve visibility across day-to-day processes.

Senior Software Engineering Manager

Sep 2023 - Nov 2025 · 2 yr 3 mos

4Nexgen Enterprises (Mandaue, Central Visayas, Philippines)

Developed JINA-AI, an AI-driven virtual assistant platform that delivers intelligent chatbot solutions and business automation for end users and organizations. Designed and implemented core product features, optimized system performance, and validated quality to ensure stable, production-ready releases. Built Xterium, a secure blockchain wallet spanning mobile, web, and browser applications, establishing the foundation for multi-platform digital asset management across supported networks. Owned end-to-end feature development, from implementation and performance improvements to release readiness, while coordinating project tasks and delivery timelines across platforms.

Software Engineer / IT Business Analyst

Feb 2023 - Aug 2023 · 7 mos

HUMEDIT Co., Ltd (Chiyoda, Tokyo, Japan)

Transitioned to an on-site role in Tokyo at HUMEDIT, the Japan-based counterpart of Human Incubator. Worked as a Software Engineer and IT Business Analyst on healthcare platforms including NIPT, dermatology reservation systems, and invoicing solutions. Collaborated with Japanese and Philippine teams to gather requirements, clarify business needs, and translate them into technical improvements. Delivered feature enhancements, resolved production issues, and strengthened clinic and operational workflows to meet quality and delivery expectations.

Software Engineering Team Lead

Jun 2021 - Jan 2023 · 1 yr 8 mos

Human Incubator Inc. (Cebu, Central Visayas, Philippines)

Developed the Beauty System, a dermatology reservation platform enabling patients to book appointments, track treatments, manage billing, and monitor staff calendars. Designed and implemented an invoicing application for patient management and financial tracking across clinic operations. Coordinated engineering delivery, upheld code quality, and shipped solutions that improved operational efficiency, patient management, and user satisfaction within the company's healthcare product ecosystem.

Software Engineer

Jan 2019 - Jun 2021 · 2 yrs 6 mos

Liteclerk Corporation (Cebu, Central Visayas, Philippines)

Enhanced Liteclerk Accounting Software into a more capable cloud-based SaaS platform for trading businesses, improving reporting, financial management, inventory workflows, and overall system reliability. Developed a new version of Liteclerk POS with real-time inventory tracking, sales and collection summaries, and operational reporting to support day-to-day business control. Also customized systems for clients, including Vaccine Tracker for vaccination eligibility monitoring and notifications, and IntelliStream for streaming subscription budgeting and optimization. Collaborated with teammates to integrate features, resolve technical issues, and deliver client-ready improvements across these products.

Software Developer

Apr 2016 - Jan 2019 · 2 yrs 10 mos

Innosoft Solutions Services Inc. (Cebu, Central Visayas, Philippines)

Began as an intern and was later absorbed into a full-time Software Developer role. Developed the Innosoft website and CRM platform to manage leads, deliveries, and client support, with features for sales activity logging, issue tracking, and account executive performance monitoring. Designed and developed Easyfis Accounting Software, which later evolved into Liteclerk Accounting Software and formed the product foundation of Liteclerk Corporation.
